AI Evidence Log

Why first-time Indian mutual-fund investors lapse by month 12

Grounded public evidence, source links, and machine-readable codes. Every quote in this log was verified against the source document.

Signals: 334 · Documents with signals: 332 · Themes: 11
Public sources only: Play Store, App Store, Reddit, YouTube, ValuePickr, TradingQ&A.; No internal analytics, CRM records, or primary interviews.

How to read this log

Each row is one grounded signal: a short exact quote from a public post plus the behaviour, trigger, emotion, expectation, outcome, and journey-stage codes that the quote supports. Codes that were not supported by the quote were dropped by the deterministic grounding layer. Segment cues may use a separate verified segment quote. The full machine-readable table is in ai_evidence_log.csv and ai_evidence_log.jsonl.

Theme summary

Theme	Signals	Docs	Lapse rate	Lift	Score
Failed debits and mandate breakage	59	59	n/a	n/a	70.7
Can't stop or fix it	38	38	89%	1.15x	65.8
What keeps SIPs alive	49	49	0%	n/a (protective)	53.8
Cash-flow shocks and competing commitments	14	14	100%	1.29x	52.5
Which fund, which goal?	6	6	100%	1.29x	43.1
Market noise and loss aversion	31	31	55%	0.70x	42.9
Returns didn't match the promise	3	3	n/a	n/a	24.0
I don't know what I bought	1	1	n/a	n/a	21.7
Paused by the system, not the investor	7	7	50%	0.64x	19.7
Out of sight, out of mind	5	5	50%	0.64x	15.1

n/a = no resolved outcome in public posts; the opportunity score uses a friction prior, not an observed lapse rate. Lift compares the theme's lapse rate with the corpus baseline.

Failed debits and mandate breakage

A debit, UPI Autopay, NACH mandate, bank link, or bank-side block failed or required repair. · Signals: 59 · Documents: 59 · Lapse rate: n/a · Lift: n/a · Opportunity score: 70.7

Verification and guardrails

Quote verification: every behavioural quote is checked as a normalized substring of the source document. Quotes that cannot be verified, exceed the length limit, or rely on a soft match are rejected. Grounding then checks sentence-level keyword support, first-person action language, attempt-vs-completed actions, payment-mechanism language, temporary-stop language, and separate segment evidence. The LLM is used for extraction and drafting, not for counting. No specific funds or stocks are recommended; no fear, FOMO, or urgency nudges are used in the interventions.

Column dictionary

Column	Meaning
ID	Stable signal identifier within this corpus snapshot.
Source	Platform and app/forum label, for example reddit or app_store:Kuvera.
Quote	Exact verified substring from the public document; no paraphrase.
Outcome / stage	Self-reported outcome, journey stage, and confidence; unknown means not stated.
Codes	T = trigger, B = behaviour, E = emotion, X = expectation. Codes are grounded.
Link	Public URL, truncated in the PDF; full URL in the CSV/JSONL export.

How to cite: INDmoney SIP Discovery Engine, AI Evidence Log, October 2026. Signal IDs are stable within this snapshot; re-extraction can change them. The full machine-readable exports are data/exports/ai_evidence_log.csv and ai_evidence_log.jsonl.
